Khun Piyathida Thurachon, Director of Leisure & Entertainment of IMPACT Exhibition Management Co., Ltd, has recently pinned down the business success of IMPACT Speed Park, the first world-class electric go-karting facility in Thailand that offers myriad racing options for all walks of life including electric, gasoline, and two-seater go karts. With the introduction of "Mini Electric Gokart," we believe that children from five years old and up with a minimum height of 100 cm will be able to operate a go kart on their own and have fun riding it. Smart, stylish, and electric-powered, the mini go kart offers a genuine karting experience while providing zero emissions.

The new Mini Electric Karts are available every day at IMPACT Speed Park during our advertised opening hours on a special course that's been designed for children to have fun in a safe environment while parents have peace of mind with total monitoring capability. Our introductory pricing is 300 baht for 10 minutes.
